# Examiners' Report <br> Final Honour School of Mathematics and Philosophy Part C Trinity Term 2020 

## Part I

## A. STATISTICS

- Numbers and percentages in each class.

See Table 11, page 1 .

- Numbers of vivas and effects of vivas on classes of result.

Not applicable.

- Marking of scripts.

All Philosophy scripts, essays and theses were double-marked. The mathematics dissertations and mini-projects were double-marked. All Mathematics examination scripts were, as is the normal practice, single-marked according to carefully checked model solutions and a pre-defined marking scheme which is closely adhered to. A comprehensive independent checking procedure is also followed. (See the Mathematics Part C report for details.)

## B. New examining methods and procedure in the 2020 examinations

In light of Covid 19, the department took steps to mitigate the impact of the pandemic on academic performance. This included changing the examinations to open-book version of the standard exam papers, reducing the units required from 8 to 6 , the introduction of the safety net and Declared to have Deserved Masters. In addition, the method of assessing mitigating circumstances at the exam board was changed. An additional hour was also added on to the Mathematics exam duration to allow candidates the technical time to download and submit their examination papers via Weblearn. Given the unusual circumstances and impact of Covid-19, ranking was only used for the purposes of awarding prizes. The introduction of the safety net (which was applied to cohorts) meant that the overall average and hence rank was not well defined.

## C. Changes in examining methods and procedures currently under discussion or contemplated for the future

Due to the uncertainty with the pandemic, the department decided that exams will be taken online for Trinity Term 2021.

## D. Notice of examination conventions for candidates

The first notice to candidates was issued on 19th February 2020 and the second notice on 6th May 2020. These contain details of the examinations and assessments.

All notices and the examination conventions for 2020 examinations are on-line at http://www.maths.ox.ac.uk/members/students/undergraduate-courses/examinations-assessments.

## Part II

## A. General Comments on the Examination

The examiners are very grateful to James Knight in the Philosophy Centre and Nicole Collins, Waldemar Schlackow and Charlotte Turner-Smith in the Mathematical Institute for their enormous help at all stages in the conduct of this examination. We would also like to thank Elle Styler, and the rest of the Academic Administration Team for all their work during the busy exam period. We are grateful also to examiners and assessors in Philosophy and in Mathematics who set papers and marked scripts and theses of candidates in this examination.
The internal examiners are grateful to the external examiners Dr Jon Woolf (Mathematics) and Professor Alexander Bird (Philosophy) for generously performing their special roles in this process.

## B. Equality and Diversity issues and breakdown of the results by gender

Table 2, page 4 shows percentages of male and female candidates for each class of the degree.
Table 2: Breakdown of results by gender

## C. Detailed numbers on candidates' performance in each part of the exam

See Table 3, page 4 for the number of candidates taking each Mathematics paper, together with statistics for the raw marks (average and standard deviation), and USMs (average and standard deviation) attained on each paper by this cohort. All papers listed are units except the Mathematics Dissertation, which is a double unit. The total maximum raw marks for a unit is 50 whilst the USMs are scaled to a maximum of 100 . In accordance with University guidelines, statistics are not given for papers where the number of candidates was five or fewer.

See Table 4, page 5 for the number of candidates taking each Philosophy paper, together with statistics for the USMs (average and standard deviation) attained in the examination and the extended essay in each subject by this cohort.

In accordance with University guidelines, statistics are not given for papers where the number of candidates was five or fewer. This year this applied to all Philosophy papers.
