Oxford Mathematics Public Lectures
## Edward Frenkel

07.07.14
"Love and Math"

We are delighted to announce our latest Public Lecture featuring the New York Times bestselling book *Love and Math* by Edward Frenkel.

Edward Frenkel is a professor at the University of California at Berkeley, the winner of the Hermann Weyl Prize in mathematical physics, and a member of the American Academy of Arts and Sciences.

Love and Math tells two intertwined stories: the wonders of mathematics and one young man's journey learning and living it. The book shows that mathematics – far from occupying a specialist niche – goes to the heart of all matter, uniting us across cultures. It is an invitation to discover the hidden magic universe of mathematics.

Love & Math

The Heart of Hidden Reality

EDWARD FRENKEL

"If you're not a mathematician this book might make you want to become one."
—NASSIM NICHOLAS TALEB, author of *The Black Swan*

Presentation and discussion with
Edward Frenkel, followed by a book signing.
Moderator: Marcus du Sautoy
