

POLYCRYSTALS: MICROSTRUCTURE AND EFFECTIVE PROPERTIES

26 - 28 March 2018, Andrew Wiles Building, Oxford

Speakers

Barbora Benešová (University of Würzburg)

Kaushik Bhattacharya (Caltech)

Klaus Hackl (Ruhr-University Bochum)

Goro Miyamoto (Tohoku University)

Michaël Peigney (École des Ponts Paris Tech)

Robert Pond (University of Exeter)

Angkana Rüland (Max Planck, Leipzig)

Anja Schlömerkemper (University of Würzburg)

Petr Sedlák (Czech Academy of Sciences)

Akinobu Shibata (Kyoto University)

Thomas Waitz (University of Vienna)

Angus Wilkinson (University of Oxford)

www.maths.ox.ac.uk/r/polycrystals

Organisers: John Ball (Oxford) & Tomonari Inamura (Tokyo Institute of Technology)

Image: Martensite microstructure in polycrystalline Ti-Nb-Al shape memory alloy (Tomonari Inamura)
