

Join us at **Jane Street's** upcoming

Estimathon!

Do you know how many computers were connected to the Internet on January 1, 1989? Or how many YouTube videos have more than 1 billion views? What about the bandwidth beneath the Atlantic Ocean?

If you want to solve problems like these, join us at our upcoming **Estimathon** — a team-based contest that combines trivia, game theory, and mathematical thinking. Participants will be placed in teams that will be tasked with solving 13 estimation problems in just 30 minutes.

After the Estimathon concludes, join us for a Q&A session to learn more about the firm's work and opportunities.

WHEN:

Wednesday, October 29th @ 6:00pm GMT

WHERE:

University of Oxford Campus
