

GSA Quant Research Workshop

Workshop Date: 10 November 2025, 6pm – 8:30pm

Application Deadline: 2 November 2025 at 5pm

Location: L6, Oxford University Mathematical Institute, OX2 6GG

Have you ever wanted to find out how to build your own algorithmic trading strategies? Our researchers are holding a two-hour workshop on quantitative trading in which they will candidly explain what it really involves. You will be guided through the process of devising a trading strategy with advice and support from instructors with years of industry experience. A range of prizes and giveaways will be posted after the event.

Are you:

- Curious how quantitative traders aim to deliver superior long-term investment performance?
- A quantitative thinker with a deep interest in statistics, probability, and technology?
- Intrigued by developing performant and insightful solutions to challenging modelling problems?
- Keen to use logical reasoning and data to formulate and test hypotheses about the behaviour of financial markets?

What can you expect?

- An open-ended, difficult to solve problem. Specifically, building an algorithmic trading strategy.
- An accompanying mini-lecture where we explain what quantitative trading really involves.
- Advice and support from instructors with industry experience of developing trading strategies.
- Prizes for the best performing strategies plus other goodies.

Places are allocated on a suitability basis and are limited to **20 students**. Please **apply** via our event listings at [Join us // GSA](#).

About GSA:

GSA Capital is a multi-award winning investment manager that has been delivering exceptional results for over 20 years. With offices in London and New York, GSA Capital combines a world-class proprietary platform with innovative thinking to develop and deploy systematic and process-driven investment strategies across all asset classes, geographies and timescales.
