

PhD in Statistics:

Warwick Centre for Doctoral Training in Statistics

Your pathway to a career in Research and Innovation

Theoretical, Applied and Computational Statistics
Probability | Mathematical Finance | Statistical Machine Learning

The Department of Statistics at Warwick is an international centre for excellence, attracting researchers from all over the world in statistics and probability.

We have a thriving PhD programme and a long-established reputation for research activity of the highest quality. The Centre for Doctoral Training offers an intellectually stimulating dynamic and supportive atmosphere for PhD study.

- ▶ One of the world's top Statistics departments*, with more than 60 academics with expertise over a broad range of research areas, producing world-class research**
- ▶ An innovative and flexible training programme, with a large and diverse choice of taught graduate-level topics, reading groups, seminars and other opportunities for professional development
- ▶ An active and inclusive community of over 60 PhD students
- ▶ Part of a network of excellence, with close links to the Warwick Mathematics and Computer Science Departments and the Alan Turing Institute
- ▶ 10+ fully funded scholarships available (Tuition and Stipend), with additional funding via China Scholarship Council and Chancellor's scholarships (details on our website)
